

VISHWAS MODHERA

Surat, India | vishwas.modhera.codes@gmail.com | +91-9574188861 | [linkedin/vishwas-modhera](https://www.linkedin.com/in/vishwas-modhera)

PROFESSIONAL SUMMARY

Data Analytics Engineer with ~5 years of experience architecting enterprise-scale data infrastructure, scalable pipelines, and dimensional models that drive strategic vision and revenue growth. Expert in Snowflake, dbt, SQL, and Python, with a proven track record of engineering robust quality frameworks and centralized semantic layers. Forward-looking builder with a high-ownership mindset, experienced in preparing data architecture for AI-augmented analytics and delivering actionable intelligence to VP and C-level executives.

TECHNICAL SKILLS

- **Data Warehousing & Architecture:** Snowflake (Query Optimization, RBAC), AWS Redshift, Databricks Data Warehouse, Dimensional Modeling, Medallion Architecture, Object Rationalization
- **Data Engineering & Orchestration:** dbt (Cloud, Tests, CI/CD), Airflow, PySpark, Talend, ETL/ELT Automation
- **Languages:** Expert SQL (Window Functions, CTEs, Multi-level Aggregations), Intermediate Python (Pandas, NumPy), Jinja, Shell Scripting
- **BI & Semantic Layer Design:** Looker (LookML), Power BI, Semantic Model Consumption, Self-Service Analytics
- **DevOps & Quality:** Git (Branching, PR Workflows), CI/CD, Data Observability, Row Count Validation, Null Assertions, Referential Integrity Checks

PROFESSIONAL EXPERIENCE

Data Analytics Engineer — Cimpress India

(Sep 2024 - Present) | Remote, India

- **Enterprise Architecture & Semantic Modeling:** Architected scalable enterprise semantic layers and dimensional models, streamlining complex supply chain and production reporting for top-line executives, resulting in a ~10% increase in operational efficiency.
- **Robust Pipeline Engineering:** Engineered production-grade data pipelines, instrumenting strict quality frameworks—including dbt tests, row count validation, null assertions, and referential integrity checks—eliminating pipeline anomalies by 40% and ensuring 99.9% metric reliability for executive reporting.
- **Process Automation & CI/CD:** Developed production-ready scripts for pipeline automation and integrated CI/CD workflows utilizing Git branch management, accelerating deployment cycles for critical workflow safety and operational reporting.
- **Technologies Utilized:** Snowflake, dbt, Looker, Python, SQL

Data Engineer Consultant — Tredence Inc.

(Feb 2024 - Sep 2024) | Pune, Maharashtra

- **Scalable Pipeline Development:** Designed and maintained high-throughput, idempotent streaming and batch pipelines to ingest and process 5M+ daily records from diverse sources into enterprise data lakehouses.
- **Data Modeling & Optimization:** Implemented a full-scale Medallion Architecture, executing complex transformations to optimize storage and compute, which reduced dashboard load times by 25% and query latency by 30%.
- **Advanced Analytics Enablement:** Collaborated with downstream analysts to build highly optimized data structures and tables, ensuring clean handoffs and enabling scalable business intelligence and feature engineering.
- **Technologies Utilized:** Databricks, Databricks SQL & dlt, Python, PySpark, SQL

Associate Data Engineer — Aretove Technologies Pvt Ltd

(May 2023 - Feb 2024) | Pune, Maharashtra

- **Cloud Data Migration:** Led the end-to-end migration of 250GB of legacy transformation logic into modern data models, executing complex multi-level aggregations and query performance profiling to improve query flexibility and execution speed.
- **Pipeline Automation:** Programmed automated data validation and ELT scripts for lightweight data wrangling, reclaiming 15 hours per week of manual effort and accelerating root-cause analysis for data-layer issues.
- **BI Integration:** Diagnosed and resolved data-layer issues surfacing as report-layer errors, structuring clean data integration for semantic model consumption to enable seamless self-service analytics.
- **Technologies Utilized:** MySQL, Postgres, Talend, Python, Looker, SQL

Data Engineer — Piramal Capital & Housing Finance

(Jun 2021 - Nov 2022) | Bangalore, Karnataka

- **Orchestration & Revenue Impact:** Designed and orchestrated robust ETL/ELT pipelines using DAG dependency management, aggregating enterprise metrics that drove a 15% increase in employee activity and ₹200 crore in additional disbursements.
- **Data Warehousing & Risk Analytics:** Built comprehensive portfolio-risk tracking data marts managing complex data cardinality, engineering an automated warning pipeline that slashed threshold breach detection time from 3 days to near real-time.
- **Technologies Utilized:** Power BI, Apache Airflow, Snowflake, AWS Redshift, SQL

EDUCATION

- **IIT Surat** — B.Tech in Computer Science and Engineering (8.62 CGPA) (Aug 2017 - Jun 2021)
- **Kendriya Vidyalaya No. 1 Surat** — All India Senior School Certificate Exam (95.2%) (Apr 2016 - Mar 2017)
